Profile: I earned my Ph.D. degree in 2014 from the Hong Kong Polytechnic University (PolyU), Hong Kong. I have the honor to be the first Pakistani (out of 300 applicants from Pakistan) who was selected for the prestigious Hong Kong Ph.D. Fellowship in the pioneer batch of 2010. From 2014 to 2017, I worked as a Postdoctoral Fellow at PolyU, Hong Kong. In October 2017, I joined Nanjing University of Information Science and Technology as a Professor. In October 2018, the Jiangsu Provincial Education Department conferred me the special title of “Distinguished Professor” based on my outstanding research achievements. I have developed three robust methods, i.e., (i) **Simplified Aerosol Retrieval Algorithm (SARA)**, (ii) **Simplified Merge Scheme (SMS)**, and (iii) **Simplified and Robust Surface Reflectance Estimation Method (SREM)**.
